SUMMER 2016 BUILDING SOLUTIONS

ARC Projects: Before And After

Before

After

German American Bank

ARC's latest remodel has taken place at German American Bank. ARC helped to create a more modern façade and updated interior to the bank located on St. Joseph's Avenue in Evansville's west side.

ARC renovated the bank by raising its exterior by more than a foot, adding some much-needed upgrades to the siding and roof of the building. Other exterior renovations included the installation of a new three-lane teller express window and new exterior signage.

Inside, ARC renovated four offices and the break room. Additionally, new interior signage, floor coverings, new custom mahogany wood casework, energy efficient lighting and a new custom countertop with mahogany trim helped to create a more professional appearance inside the bank.

University of Evansville Bower-Suhrheinrich Library

ARC Construction Co., Inc. recently renovated the University of Evansville Bower-Suhrheinrich Library. The library, which was built more than 30 years ago, has not undergone any major renovations until now.

The project included an interior renovation to all four floors of the library, as well as a new entry for the building, with wood flooring and ceiling. The project also consisted of creating a beautiful, new window display in the existing exterior wall of the library, and new lighting and ceilings on the third and fourth floor, as well as seven new study rooms on the fourth floor. The stairwells on both ends of the library were upgraded with floor finishes and new light fixtures.

ARC renovated the conference room, added computer stations and vending areas to the first floor, added wood column wraps throughout the building, installed a custom circulation desk with a 3form chroma panel, and removed drinking fountains in the library, replacing them with new ADA compliant fountains accompanied with bottle filling stations. ARC's work renovating the library received special mention at the Dedication Ceremony on February 19, 2016.

Thinking about renovating or building a new facility?

Call us with any questions you might have to help design or construct the building to meet your specific needs. Call Danny Bateman at 812-426-0481 or toll free at 877-225-6410.

ARC's Own Ironman

ARC would like to congratulate Linda Molinet, 51, for completing the Louisville Ironman last October. The Louisville Ironman consists of a 2.4-mile swim in the Ohio River, a 112-mile bike ride through the hills of Louisville and surrounding counties, followed by a 26.2-mile run. The 140.6 mile trek finishes in Louisville's 4th St. Live downtown district.

Linda began her journey to the finish line almost one year before race day. With only minor setbacks during training (an emergency appendectomy and broken finger), she crossed the finish line in 15:11:28.

Linda has been a Project Coordinator with ARC Construction for 16 years. Congratulations, Linda!
